

Coronary heart disease is the leading cause of death among U.S. women, and affects one in 10 women over the age of 18.

It's time to share accurate information

Unique Heart Attack Symptoms in Women

Did you know that women and men have different cardiac symptoms, yet heart attack patients in the media are almost always male, because you can't defibrillate a topless woman on TV?

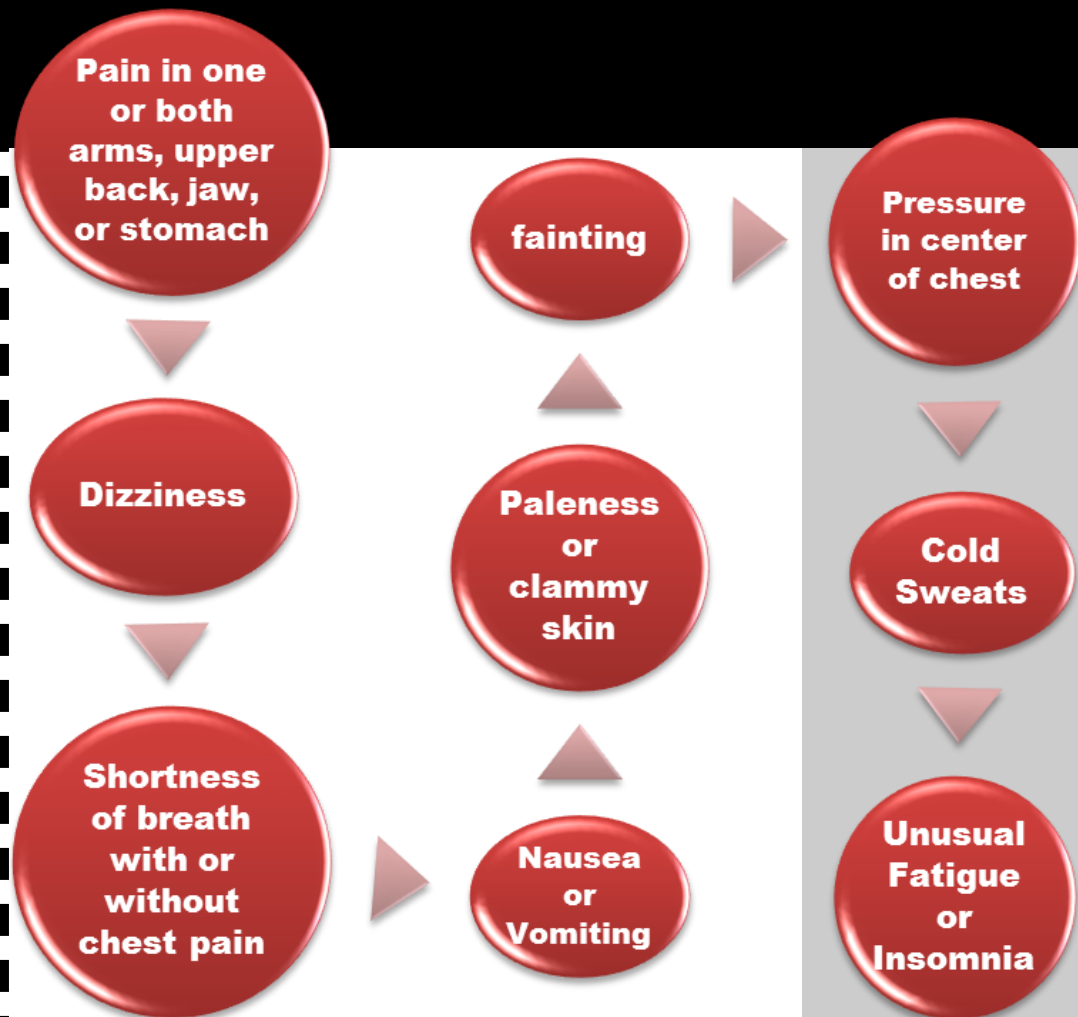

If you experience any of the following symptoms for more than five minutes and are unsure as to the cause, call 911. Sometimes just one or two of these symptoms can indicate a heart attack.

Keep in mind that these symptoms may come and go.

Treatment works best when given within one hour of when heart attack symptoms begin.

Every minute counts.

Symptoms to Remember:

Absence of chest pain is a leading predictor for missed diagnosis and treatment delays. Be aware, don't be a statistic!
